Hi, our kids are trying to improve the performance of our robot in the City Shaper, and they are considering using the Lego bracket separator (that orange thing) as the wedge to solve the Traffic Jam mission. I am not exactly sure whether this is allowed in the game though.

I see there is a discussion on the forum last month

<https://forums.firstinspires.org/forum/general-discussions/first-programs/first-lego-league/the-challenge/rules-missions/90798-use-of-brick-separator>

I understand neither forum or email is official reference for referee at the field, just want to see whether you are aware of similar case?

Thanks

Jerry You
